

253DNF Visual Studio Framework Now Available For OpenQM

South Africa based 253 Technologies have announced availability of their 253DNF Visual Studio framework for OpenQM, adding to the ability to connect to D3, MySQL and SQLServer.

This framework sets standards for developers without concerning themselves with database linking and access.

Some software development companies in South Africa have already adopted the framework, migrating from D3 to OpenQM.

Software packages available from 253 Technologies that are now available for OpenQM include:

- e-Recruitment
- Banking System
- Accounting Software for Financial Service Providers and Asset Managers
- ERP (includes Inventory Control, Accounts Receivable and Payable & Financials)
- Production
- An internet based system for Agents orders to factory with full reporting (Window Blinds made to measure).
- FICA (Financial Institute Credit Act)
